

JOB OPENING

Logistics Project Manager

Full-Time - Curacao

We are looking for a competent Logistics Project Manager who is responsible for the overall logistics and warehouse functions. The Logistics Project Manager will be responsible for reviewing the current systems and processes and develop and implement a warehouse management system with the goal of improving efficiencies, streamlining processes, creating transparencies and reducing costs.

Key Responsibilities:

- Directing, optimizing and coordinating full shipment cycle.
- Develop procedures to achieve efficient and effective logistics processes.
- Engage with key internal and external stakeholders to improve processes.
- Maintain metrics and analyze data to assess performance and implement improvements.
- Work with all distribution locations and cross functional teams to ensure process changes are successfully implemented.
- Coach and train warehouse staff.

Job Requirements:

- Minimum university degree in Business Administration or similar
- Minimum 5 years experience in a logistics management role
- Excellent process improvement and logistics management skills
- Flexible with working hours and able to travel to other locations
- Organized, professional attitude and ability to be flexible and deal with change, can work under pressure
