Are you an expert in IT security, risk management, and compliance? RAC is looking for an IT Security Officer to ensure our technology infrastructure is secure, resilient, and compliant with regulatory standards. If you have experience in cybersecurity, IT governance, and data protection, we want to hear from you!

KEY RESPONSIBILITIES

- Develop, implement and enforce IT security policies, risk assessments, and compliance frameworks.
- Ensure adherence to data protection regulations such as GDPR and ISO 27001 while staying up to date with evolving regulatory requirements.
- Continuously monitor and respond to security threats, incidents, and vulnerabilities.
- Lead incident response efforts, ensuring timely mitigation and reporting of security events.
- Manage firewall security, encryption, and intrusion detection systems.

WHAT WE ARE LOOKING FOR

- Bachelor's degree in Information Security, Computer Science, or a related field.
- 3+ years of experience in IT security, risk management, or compliance.
- Strong knowledge of ISO 27001, NIST, GDPR, and other security standards.
- Experience with firewalls, encryption, threat detection, and security audits.
- Ability to work in a fast-paced regulatory environment.
