

SUPERVISOR ARUBA/CURACAO

Company Profile

Vestas Aruba is a branch organization from Vestas Benelux B.V. based in Arnhem the Netherlands. On Aruba we have 30 MW of V90 wind turbines installed, and 30 MW of V90 wind turbines, and 16.5MW of V117 wind turbines installed on Curacao. We have long term Service agreements in place for all turbines and to honor the agreements made with the customer (and future projects) we are looking for a:

Supervisor Service Aruba/Curacao

Tasks and responsibilities:

- Manage daily operations on both islands;
- Daily reporting of the planned and unplanned activities;
- Lead and initiate daily operational meetings with Service Mechanics and (if applicable) subcontractors;
- Make and adjust daily planning schedules and maintenance programs;
- Drive KPI visual management (Daily management)
- Secure world class Quality in task execution
- Act as counterpart to Customer's Service Management
- Ensure timely availability and delivery of needed materials and tools;
- Responsible for the warehouse and (tool) administration thereof;
- Ensure for safe, timely, authorized and efficient execution of the service works by the Service Mechanics on site and (if applicable) subcontractors;
- Ensure compliance and enforcement of (safety) procedures, legislations, manuals and all standards regarding safety, quality and environment;
- Periodical reports of the different sides and employees to the Service Manager (Benelux);
- Host operational meetings with the local customer, always discussed upfront with either the Service Manager and or Customer Relations Manager;
- Present and discuss toolbox meetings;

The Supervisor is expected to also perform (daily) operational tasks together with the colleagues on site. That means (Service) related works in and around the wind turbines.

Education and competencies

- Minimal Technical diploma in Mechanical land/or Electrical works;
- Several years of experience within the Wind energy sector, preferably with the Vestas portfolio;
- Safety mindset and an ambassador of a safety culture;
- (Operational) Leadership qualities; Ensure high ownership and responsibility of his staff
- Excellent communication skills
- Proficient in English, both in verbal and written form;
- High degree of flexibility, team spirit and able to operate independently;
- Knowledge of MS Office and SAP
- Able to generate, interpret and present reports on (for example) turbine performance, efficiency, costs etc.

For this position we are looking for someone who has several years of experience in the wind industry and preferably within Vestas. You must be able to cope with stressful situations, an excellent planner and organizer, independent, motivator and you must like the challenge to make the local Vestas organizations on Aruba and Curacao to be one of the best performers within Vestas. In both operational excellence as in team spirit.

Are you interested?

Please write, in English, an e-mail with a motivation and Curriculum Vitae to the hiring manager, Bram Bloemberg, Manager Service (brbbe@vestas.com).

Closure for this vacancy is: 01-12-2017
