

JOB OPENING

Logistics Project Manager

Full-Time - Curacao

Key Responsibilities:

- Design, plan, develop and implement a warehouse management system with the goal of improving efficiencies, controlling inventory, streamlining processes, creating transparencies and reducing costs.
- Develop operational process flows for existing and new warehouse management processes and functionality.
- Develop procedures to achieve efficient and effective business processes utilizing new operational systems.
- Manage and report on project budgets and time lines according to project assignments.
- Engage with key internal and external stakeholders to change behaviors to drive process improvement.
- Responsible for successful project completion according to project plan including but not limited to site preparation, process development/documentation, system configuration, testing, training, and start up.
- Responsible for on-going project status reporting and risk management.
- Work with all distribution locations and cross functional teams to ensure process changes are successfully implemented.

Job Requirements:

- Full understanding of a complete project lifecycle
- Experience with software implementation
- University degree or higher. Project manager certification preferred
- Previous logistics experience is a plus
- Organized with ability to prioritize work load and work under pressure
- Good verbal and written communication skills in English and Dutch
- Customer focused
- Flexible to travel
